This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together sociological and legal-discursive traditions. It advances the idea that the social problem of law is a question of how law is used to define and legitimate social order. The work analyzes the tension between the solidarity of the family and the solidarity of the state, and how these tensions are played out in the legal system. The work also examines the role of the law as a means of social control and the ways in which the law is used to reinforce social hierarchies. This book provides a valuable contribution to the study of social problems and the sociology of law, and will be of interest to students and scholars in sociology, law, and political science.
